SUNJOY®

Sunjoy panels is the only infrared heating panel on the market with nanotechnology. These panels have the presence of silver-nano materials which bring about a sterilization effect and anion (negative only). Tourmaline material contributes to a deodorization effect. These Sunjoy IR Panels purifies the air and emits refreshing air that captures vitamins in the air, contributing to an overall relaxation that activates the cells of the body heightening the overall resistance to disease.

- Instant heat
- Easy install
- Freeing up valuable wall space
- No carbon monoxide emitted
- Suitable for bathrooms
- A discreet heating solution

Model	Wattage (W)	Size (mm)	Weight (kg)	Suitable Area (m ²)	Warranty (yrs)
SR5	600	900 x 600 x 15	4	0/10	10
SR7	750	1200 x 600 x 15	6	10/15	10
SR8	900	1500 x 600 x 15	7	15/22	10

PRIMA

PH32	3200	1880 x 180 x 74	11.6	150/200	5

Outdoor Heater

Designed for outdoor heating and offers more power and concentrated heating compared to our hybrid Space Heater PH-series, making it perfectly suitable for windy uncovered outdoor areas. The PC-series is rated IP65, making it waterproof and usable for most outdoor applications. Its unique ultra low light carbon fibre heating element is the key difference compared to existing outdoor heaters on the market using mostly halogen or quartz. This grants a longer lifespan and higher energy efficiency. The integrated control system allows operation of 2 power levels using a simple remote control. Also available with portable stand.

Model	Wattage (W)	Size (mm)	Weight (kg)	Warranty (yrs)
PS25 pro	1250/2500	720 x 120 x 120	3.3	3
PS25	1250/2500	720 x 120 x 120	3.3	3

Foot Warmer Portable Heater

Small portable heater specially designed for our customers who like to benefits of infrared heating with the added advantage of it ease of portability. Move this around your home or work space providing personal heating for legs and feet. This low energy infrared heater provides a supplementary heating solution at minimal cost. Hourly running cost as little as 3 to 4 cent per working hour (based on 15 cent per kW/h).

When compared to blow heaters or fluid radiators, these convector heater heat the air and the heat moves upwards from the heater. The Infrared SR220 uses radiant heating technology to directly radiate direct objects located in front of infrared plate while not too hot to touch.

Model	Wattage (W)	Size (mm)	Weight (kg)	Warranty (yrs)
SR220	220	600 X 450	4	4

Infrared Mirror Heaters

Infrared Smart 3-in-1 Mirror
